TITLE	Rare diseases				
PROF.	Giuseppe Limongelli				
SSD	MED/11				
GENERAL AND SPECIFIC OBJECTIVES	Rare diseases are diseases which affect a small number of people compared to the general population and specific issues are raised in relation to their rarity. In Europe, a disease is rare when it affects 1 person per 2000. A disease can be rare in one region, but common in another. A theme very important for these patients is: " Bridging Health and Social Care", a need deeply felt by the whole community of people with rare diseases, the health supply and the social one often meets by a series of needs, such as "home therapy", physical rehabilitative or qualifying therapies, access to social support services, all problems that will be discussed in this event.				
ACTIVITY TYPE	PROPOSED ACTIVITY	MINIMUM DURATION (HOUR)	ADE DURATION (HOUR)	CFU	PROPOSED CFU
