TITLE	Conference on "Innovation in Pneumology 3.0"				
PROF.	Andrea Bianco				
SSD	MEDS-07/A - Respiratory Diseases				
GENERAL AND SPECIFIC OBJECTIVES	The scientific program is intended to represent, for all participants, an update on the latest developments in physio-pathological, clinical, diagnostic, therapeutic and management aspects of respiratory diseases, as well as an opportunity to share views and knowledge for respiratory physicians and scientists who deal with acute or chronic respiratory pathologies. The main objective of the Conference is to create an interactive environment between speakers and attendees. Leading experts and academics in the field will participate, reporting not only on the theoretical aspects and scientific updates on their area of expertise, but also on their experience in practical management, ensuring a valuable learning experience.

SCIENTIFIC

rationale

The scientific program is intended to represent, for all participants, an update on the latest developments in physio-pathological, clinical, diagnostic, therapeutic and management aspects of respiratory diseases, as well as an opportunity to share views and knowledge for respiratory physicians and scientists who deal with acute or chronic respiratory pathologies. The main objective of the Conference is to create an interactive environment between speakers and attendees. Leading experts and academics in the field will participate, reporting not only on the theoretical aspects and scientific updates on their area of expertise, but also on their experience in practical management, ensuring a valuable learning experience.

The congress will focus, among other topics, on:

- Advances in COPD: from pathophysiology to therapeutic approaches
 - Management of Respiratory Infections
 - Innovation in diagnosis and therapy of lung cancer in the era of precision medicine
 - New directions on perioperative approach to Lung cancer
 - Interstitial lung diseases: from diagnosis to end stage lung
 - New frontiers in pharmacology of bronchial asthma
 - Management of acute and chronic respiratory failure
 - New perspectives on genetic lung disorders: Cystic Fibrosis, AAT deficiency
