

"Therapeutic nanoproducts: from biology to innovative technology"

19–20 giugno 2019

co-organizzato da

ISTITUTO SUPERIORE DI SANITÀ

Centro Nazionale per la Ricerca e la Valutazione preclinica e clinica dei Farmaci

e

ASSOCIAZIONE ITALIANA DI COLTURE CELLULARI (AICC)

AIM and OBJECTIVES

The conference will deepen the mechanisms of interaction between new chemical-biological formulations and biophysical systems to improve the transport of drugs in normal and tumor cells. The enhancement of the therapeutic efficiency of a system of nanometric dimensions requires the development of new skills, within a strategic planning that leads to the expansion and sharing of knowledge in a multidisciplinary environment.

The purpose of this event is to improve knowledge and encourage the optimization of production methods and to deepen the regulatory aspects.

Key words: nanoproduct, cell interactions, therapeutic vesicles, innovative technologies.
