**Medicine and Surgery course in English**  
**PROPOSAL FOR ELECTIVE DIDACTIV ACTIVITIES (ADE)**  
**(please send to [gianpaolo.papaccio@unicampania.it](mailto:gianpaolo.papaccio@unicampania.it))**

<b>TITLE</b>	From hypertension to eclampsia: a multidisciplinary approach			
<b>TEACHER</b>	P. De Franciscis, M. Barbieri, P. Sansone			
<b>SPECIFIC OBJECTIVES</b> (max 500 characters)	To give to the students of the English Medical Course a comprehensive explanation of the main clinical implications of hypertension-related complications during pregnancy, their prevention and treatment. Early recognition and proper management of this disease may serve to avoid serious maternal complications. Advanced stages of this disease may result in multi-organ system dysfunction that may be life-threatening to the mother and her fetus. A multidisciplinary approach of the critical care team is required to reduce maternal morbidity and mortality.			
	<b>ACTIVITY TYPE</b>	<b>CHECK</b>	<b>HOURS</b>	<b>CFU</b>
	interactive seminar	x	6 hours (theoretical part) + 6 hours (practical part)	1
